TECHNOLOGY

We tailor our Solutions using our Engineering and best-in-class IT solutions designed to meet specific customer requirements. We have a wealth of experience utilizing our core and value added services, focusing on a range of services that can add significant value to our customers supply chain and these are detailed below.

Our Warehouse Services include:

- Inbound Scheduling & Follow Up
- Receiving
- Putaway
- Storage
- Inventory Management
- Order Management
- Picking
- Packing
- Shipping
- Quality Control
- Yard Management
- Trade Compliance
- Dashboard & Reporting
- Integration Management
- Packaging & Consumables Procurement

Our Transport Services include:

- Control Tower
- Final Mile Delivery
- FTL
- LTL
- High Value Goods Transportation
- Postal/Parcel
- Technical Distribution/White Glove Delivery
- Technical Installation

INBOUND TO MANUFACTURING

- Approved Vendor Management
- Cartonisation
- Configuration
- Cross-Docking (4 Walls)
- Inventory Optimization
- Kitting
- Line Side Delivery
- Merge in Transit
- New Product Introduction
- Packaging Design
- PO Management
- Postponement
- Repack
- Returnable Container Management
- Returns Processing
- Sequencing
- Serialization
- Shunting
- Shuttling
- Specialized Labelling
- Sub-Assembly
- Vendor Managed Inventory

FULLFILLMENT

- Asset Management
- Cartonisation
- Configuration
- Cross Docking (4 Walls)
- Customization
- E-fulfillment
- Gift Packing
- Kitting
- Merge-in-transit
- New Product Introduction
- Rack & Stack
- Retail Services
- Returns Processing
- Serialization
- Specialized Labelling
- Sub-Assembly
- Transformation & Postponement
- Vendor Managed Inventory

AFTERMARKET SERVICES

- Advance Exchange
- Asset Management
- Cartonisation
- Configuration
- Dismantling
- E-fulfillment
- Environmental Disposal
- Inventory Procurement
- Kitting
- Repair
- Returns Processing
- Scrap Management & Recycling
- Serialization
- Specialized Labelling
- Technical Rework
- Technical Upgrade
- Vendor Managed Inventory

REVERSE & REPAIR

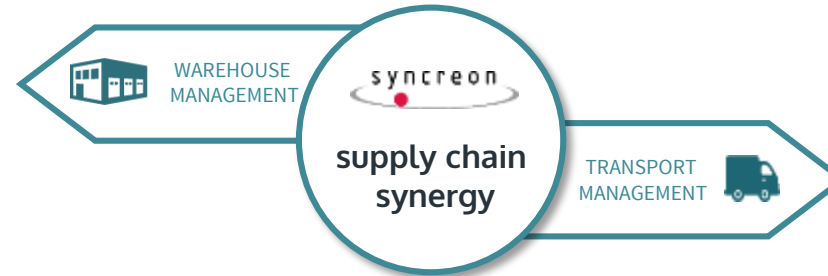

- Advance Exchange
- Certified Environmental
- Disposal
- Data Wipe
- Diagnostic Triage
- Full Service Repair
- Packaging Design
- Planning & Procurement
- Predictive Maintenance
- Product Data Expertise
- Refurbishment
- Remanufacture
- RMA & Warranty Management
- Scrap Management & Recycling
- Staging/CTO
- Swap Services
- Technical rework
- Technical Upgrade
- Test & Screen/NFF
- Value Engineering
- Vendor Managed Inventory
- Vendor Management

Our Core Solutions

syncreon specialize in the design and operation of supply chain solutions for automotive and technology customers.

AUTOMOTIVE

INBOUND TO MANUFACTURING

Services can be co-located in a customer's plant or in a facility nearby. Services include inbound receiving, vendor management, warehousing, kitting, sub assembly, metering and sequencing.

EXPORT PACKING

syncreon Export Packing solution provides for a seamless extension to a customer operation to securing receive, stage and pack parts for export to assembly plants across the world.

AFTERMARKET SERVICES

syncreon has deep experience providing reverse logistics services for Automotive OEMs. We coordinate returns of spares and defective parts back to the RDC's for restocking, rework or reuse by OEMs as well as managing spare and replacement parts in the RDC's to dealers.

REVERSE & REPAIR

We co-ordinate the materials management and integrated distribution of after sales and service parts requirements. We have a deep experience providing return and repair services for global automotive customers.

TECHNOLOGY

WAREHOUSE MANAGEMENT

syncreon is a global provider of advanced supply chain services that can be tailored to create unique solutions for our customers. Our proprietary, best-in-class warehouse management systems (WMS) help our customers monitor and optimize labour costs, order status, and inventory levels.

TRANSPORT MANAGEMENT

We select, fully integrate and manage transportation partners to achieve optimum results for our customers. We manage final mile distribution and reverse logistics transportation with a wealth of additional services available to enhance our customers supply chain.

TECHNOLOGY

INBOUND TO MANUFACTURING

Controls the inbound flow of materials into the production process. Inbound to manufacturing services can be co-located in a customer's plant or in a facility nearby.

FULFILLMENT

syncreon provides various value added services for a high profile group of clients. These services to manage forward distribution range from kitting, assembly, software loading, device flashing, etching, labelling etc.

AFTERMARKET SERVICES

syncreon has extensive experience in providing services that occur after initial distribution with many value added services offered to help extend the life of a product.

REVERSE & REPAIR

We co-ordinate the materials management and integrated distribution of after sales and service parts requirements. We have a deep experience providing return and repair services for global technology customers.
