

# Automotive Export Packing

## EXPORT PACKING SOLUTION OFFERINGS

- Cross Docking (4 Walls)
- Engineering Change Management
- Export Packing CKD – Lot
- Export Packing CKD – Part-by-Part
- Export Packing SKD
- Packaging Design & Engineering
- Returnable Container Management
- Returns Processing
- Special Corrosion Services
- Supply Chain Security

## ADDITIONAL AUTOMOTIVE SOLUTIONS

- Warehouse Management
- Inbound to Manufacturing
- Aftermarket Services
- Reverse & Repair
- Transport Management

## TECHNOLOGY SOLUTIONS

- Warehouse Management
- Inbound to Manufacturing
- Fulfillment
- Aftermarket Services
- Reverse & Repair
- Transport Management

syncreon facilitates the receiving, staging and packing of parts for export to Automotive assembly plants around the world.

Without identifying and implementing the right packaging solutions, vehicle parts could be damaged during shipment and transport costs could increase dramatically.

We have the depth of knowledge, processes and tools in place to design, test and implement the best packaging solutions for your products. We design our packaging with protection, cost effectiveness, space optimization and environmental impact in mind.

Our Export Packing solution is a seamless extension to your operations. We have the expertise to receive and unbox material shipments at overseas customer destinations, and our proprietary, best-in-class WMS ensures fast, accurate and efficient handling of received inventory. Our deconsolidation services include the management of inbound shipping containers and conveyances, and the unloading and control of parts and components.

Our knowledge and experience have enabled us to coordinate global export shipping programs for some of the largest automotive car manufacturers and OEMs. No matter your needs, we help calm the complexity.
