

# Technology Inbound to Manufacturing

## INBOUND TO MANUFACTURING SOLUTION OFFERINGS

- Approved Vendor Management
- Cross Docking (4 Walls)
- Inventory Optimization
- Kitting
- Line Side Delivery
- Merge-in-Transit
- New Product Introduction
- Packaging Design
- Postponement
- Repack
- Returnable Container Management
- Sequencing
- Serialization
- Shunting & Shuttling
- Specialized Labeling
- Sub-assembly
- Vendor Managed Inventory

## ADDITIONAL TECHNOLOGY SOLUTIONS

- Warehouse Management
- Fulfillment
- Aftermarket Services
- Reverse & Repair
- Transport Management

## AUTOMOTIVE SOLUTIONS

- Warehouse Management
- Inbound to Manufacturing
- Export Packing
- Aftermarket Services
- Reverse & Repair
- Transport Management

**syncreon's Inbound to Manufacturing solution controls the inbound flow of materials to the production process.**

We help you manage inbound deliveries from scheduling and unloading, to putaway and short- and long-term storage. Our Inbound to Manufacturing solution is supported by our in-house IT development and our culture of continuous improvement.

The efficiency of the inbound supply chain can directly affect the success of the manufacturing process. Coordinating material flow, inventory control, line side delivery, assembly and availability in a timely manner is critical to the success of all inbound operations.

We currently sequence materials to multiple global customers. We work within short time windows and employ state-of-the-art technologies and processes to ensure your parts arrive in the correct order, at the right time and in superior quality. Your manufacturing quality depends on this process working in real time.

We operate as an integral process both inside manufacturing sites and from adjacent industry/supplier parks to ensure maximum efficiencies for our technology customers.
