syncreon coordinates the materials management and integrated distribution of after sales and service parts requirements.

With over 30 years of experience in the Reverse Logistics industry and extensive expertise with various complex service models, we help you reduce costs in your supply chain and extend the useful lifecycle of your products.

We have the experience and knowledge base to provide our Reverse & Repair customers with the connected logistics, high quality service, expert materials management, exceptional data integrity and value retention solutions you desire.

Our Reverse & Repair solution offers an enhanced customer experience, including guidance by subject matter experts to ensure that maximum value is leveraged from your solution at all times. Our state of the art systems keep you informed about your products throughout your supply chain.

We minimize costs by integrating Beyond Economical Repair (BER) processes into the repair process. Our multi-vendor repair centers are located in low cost locations, and are connected to an efficient transport network to reduce turnaround times and overall supply chain costs.

Combined with our customer service excellence, our enhanced service chain performance allows us to consistently meet and exceed customer expectations, leading to world-class levels of customer satisfaction.
